# dermatology

# making a difference

---

## impacting the lives of our patients

It's been said beauty is only skin deep. However, as dermatologists, we believe it is much more. On a daily basis we see the impact our care has on the lives of our patients. They hold their head a little higher, flash a smile that shines a little brighter or walk with a skip in their step that is a little bit faster. The fact is, the rewards of our care extend well beyond the skin and that is a beautiful thing to see.

# comprehensive and

## exceptional expertise

No matter what our age or skin type, we all want skin that is beautiful and healthy. Skin that not only looks great, but feels great. At The Dermatology Institute, we understand the importance of healthy skin. Whether addressing a specific dermatologic issue or projecting a more youthful appearance, our team strives to help you achieve the results you desire.

Our department is comprised of energetic dermatologists practicing at the forefront of dermatology. They have been trained at some of the leading medical institutions and have developed exceptional expertise in the field of dermatology. As highly experienced physicians, they utilize some of the latest technologies and advanced treatments available today. In fact, this high level of care is comparable to teaching hospitals and universities with the added benefit of being conveniently close to home.

## the first step

Our team begins by precisely assessing your condition. In addition, they take the time to thoroughly discuss your situation and answer any questions you may have. With this knowledge, they then recommend a treatment plan that is the best fit for your situation. Some of the conditions they treat include:

*Acne*

*Aging skin*

*Eczema*

*Hair loss*

*Mole removal*

*Psoriasis*

*Rosacea*

*Skin cancer*

*Skin infections*

*Warts*

## separating fact from fiction

In addition to your treatment, our dermatologists may also recommend the best products for at home care. Whether over-the-counter or a prescription, our dermatologists are up-to-date on the latest advances in skin care products. They sort out those that have lasting benefits from those that are just gimmicks.

compassionate care for all ages

# looking and feeling years younger

## clinically proven to work

While there is no fountain of youth, cosmetic dermatology provides us with clinically proven methods for looking years younger. In a safe environment, our dermatologists can provide patients with age-defying treatments to generate the results they desire with surgical and non-surgical techniques. Some of the treatment options we have extensive experience performing include:

*Botox®*

*Facial & wrinkle fillers*

*Laser hair removal*

*Lip augmentation*

*Scar treatments*

*Tattoo removal*

*Chemical peels*

*Facial vein treatments*

*Laser resurfacing for wrinkles & acne scarring*

*Photodynamic therapy*

*Spider & varicose vein removal*

In addition to our procedures, we also offer patients access to the most advanced aesthetic products on the market today. These are highly effective products, mostly available at respected dermatology practices. Our dermatologists guide you in selecting the aesthetic products that will work best for you.

## a boutique feel

When you experience our services, you'll discover we built our practice with your comfort in mind. Our practice has a "boutique" feel which is relaxing and tranquil. During your initial consultation, we exchange information regarding your desired outcomes. This informal dialogue allows us to thoroughly understand your needs as well as share with you what we believe are your best treatment options. As always, we take the time to answer any questions you have.

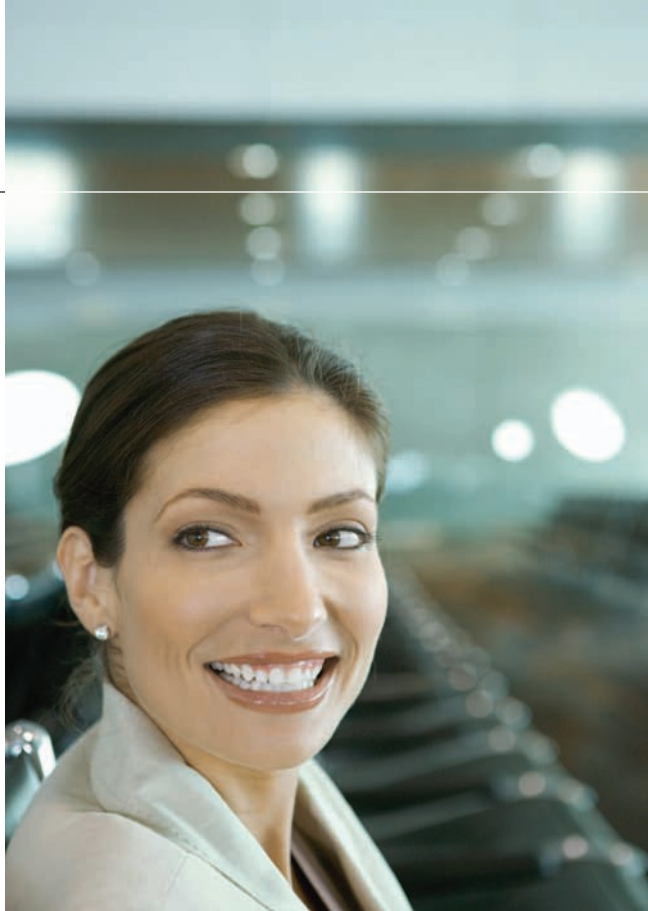

# advanced treatments for skin cancers

Excessive exposure to sun along with characteristics such as fair complexion can make one susceptible to skin cancer. Skin cancer is the number one cancer in humans. Some skin cancers can be quite aggressive and challenging to treat.

At The Dermatology Institute, you'll find physicians with exceptional expertise in treating skin cancer. Because early detection is critical, our dermatologists completely examine the body to identify suspicious skin conditions.

When a skin cancer has been detected, our dermatologists offer the most advanced treatment options. Depending on the type of cancer, treatments may include chemotherapy, radiation or surgery. Our dermatologists will develop a customized treatment plan for each patient. They will also provide support every step of the way. They educate their patients on their skin condition along with the treatments available and offer guidance to help keep their skin healthy in the years ahead.

## mohs surgery

When appropriate, Mohs Surgery allows for the immediate and complete microscopic examination and elimination of certain skin cancers. Our dermatologists are at the forefront of this procedure which yields the highest reported cure rate for many skin cancers.

## clinical research

Our department works closely with our Clinical Research Department to offer extensive clinical trials for a variety of dermatologic conditions. These trials provide patients with access to treatments and medications, often bringing welcome relief from their dermatologic issues.

## medical spa services

The Dermatology Institute offers medical spa services at most of our locations. Our medical spas are supervised by board certified dermatologists providing you the best care possible. Our services include laser hair removal, photo rejuvenation, chemical peels, laser resurfacing for wrinkles and acne scarring, microdermabrasion and customized facials.

## dupage medical group

As part of DuPage Medical Group, we are in the selective company of more than 280 physicians from practically every facet of healthcare. Should the need arise, you'll have access to the area's leading medical specialists as well as the area's finest healthcare facilities and top hospitals.
