ONCOLOGY

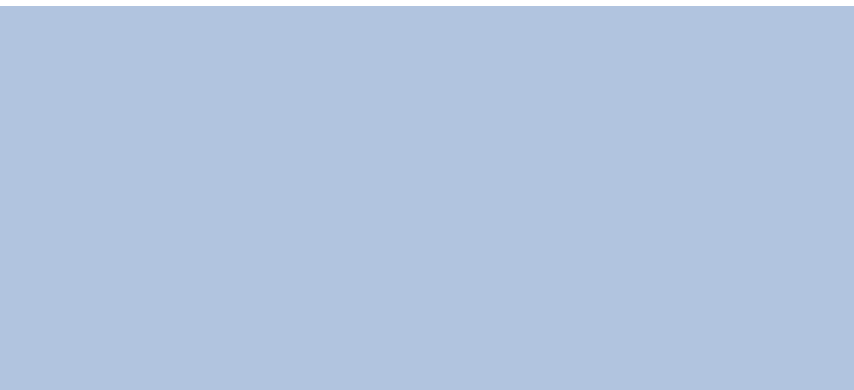

infusion center

Welcome to the Infusion Center of DuPage Medical Group. Here you'll find a dedicated team that works collaboratively to provide care that addresses your emotional and physical needs. With compassion and support, we strive to provide you with exceptional care that promotes healing and provides comfort.

welcome

designed around you

From the beginning, our infusion center was designed with your comfort in mind. We started with a soothing environment featuring ambient light, an open architecture and warm colors. We brought in the finest medical equipment along with the most comfortable treatment chairs. In addition, we added amenities such as cable television, DVD players, internet access as well as warm blankets and privacy when needed. Our goal was to make your treatments as pleasant as possible so that you can focus on your wellness.

here for you

As you prepare to receive your infusions, please understand that our doctors, nurses and other healthcare professionals are here to make your experience as comfortable and convenient as possible. Please do not hesitate to let us know if we can help you in any way. After all, we are here to care for you.

tailored to your needs

At the Infusion Center of DuPage Medical Group, each and every patient receives a custom, tailored treatment regimen. Our highly trained, healthcare professionals monitor your care every step of the way. Our nurses are specially trained in drug infusions and certified in oncology. In addition, a physician is present at all times.

Because nothing is more important than your health, our center is exceptionally clean which minimizes the risk of infections or complications. We also have an on site lab which is not only convenient for patients, but also beneficial for physicians as it allows us to easily coordinate your care and monitor your progress.

comprehensive treatments & procedures

As an infusion center, our primary function is to provide treatment to patients with infusion-related needs. We offer specialized treatments and procedures including:

Chemotherapy
